Invitation

to a presentation by

Vladimir M. Sedivy

on 23. January 2010 at 15:30

at the 2010 India International Salt Summit organised by The Indian Salt Manufacturers Association
at Nirma University Auditorium, SG Highway, Ahmedabad, Gujarat, India.

ROV Durrant / Walvis Bay / Namibia

Mechanical solar salt harvesting worldwide

Mechanised harvesting systems are the key to boosting the efficiency of solar saltworks. The harvester is the heart of the system, but it is only one element in a number of components. Brine quality, crystallizer design, salt hardness, transport, purification and stockpiling are the other important components. They all have to fit together to obtain the benefit that justifies the investment.

The presentation will review salt harvesting systems employed in Europe, Australia, and Asia. It will show successful systems as well as failures. Illustrated with a number of photographs and videos, the presentation will be published on Salt Partners website under the following link: www.salt-partners.com/publications.htm.
