# Invitation

to a presentation by  
**Vladimir M. Sedivy**

on Wednesday, 15th November 2017 at 09.10 at the Salt 2017 Middle East International Conference for the Salt Industry, organised by Roskill at the Marriott Hotel Al Jaddaf in Dubai.

Seawater reverse osmosis desalination plant  
 GRELLIER

## New Membranes make Salt Production from Desalination Reject Even More Profitable

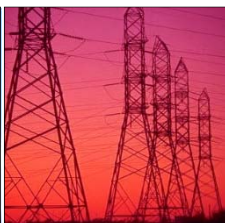

In 2011, Salt Partners proved that under special circumstances, production of salt from desalination reject is profitable. Today, new membranes can be employed, which operate at higher pressures and with better selectivity. This results in lower capital investment cost, lower operating cost and higher profitability.

The presentation will be published on Salt Partners website: [www.salt-partners.com/publications.htm](http://www.salt-partners.com/publications.htm).
