Invitation

to a presentation by

Vladimir M. Sedivy

on Friday, 17th March 2018 at the IMFORMED Mineral Recycling Forum 2018
organised by Mike O'Driscoll and Ismene Clarke in Radisson Blu Hotel, Cologne, Germany.

Salt Partners HYDREX-4 hydroextractor for slag desalting, co-invented by Vladimir M. Sedivy, Patent No. CH690840

Introducing ALUSAL[®]

Aluminium flux salt recovery and recycling process with hydroextraction

ALUSAL[®] counter-current process achieves high desalting efficiency and brine concentration, minimizing energy consumption for crystallization of recycled flux salts (NaCl and KCl). The fully desalted slag is a valuable cement additive. ALUSAL[®] is significantly more economic than conventional multi-stage flux desalting processes.

The presentation will be published on Salt Partners website: www.salt-partners.com/publications.htm.
